

D-SNP PLAN DENTAL FEATURES

Argus Dental & Vision, Inc. administers the dental benefits for Reliance Medicare Advantage. Your dental plan benefit includes oral exams, x-rays, preventive cleanings, fillings, extractions and dentures. The Argus Network is comprised of a robust network of dentists who can provide these dental services for you.

Oral Exams – Your dental benefit covers a comprehensive or periodic oral exam. A comprehensive oral exam applies to new patients, established patients who have had significant changes in their health, or patients who haven't been in active treatment for 3 or more years. A periodic oral exam is performed on an established patient.

Your plan covers:

- ✓ Office visits twice a year
- ✓ Periodic oral evaluations twice a year
- ✓ A comprehensive oral evaluation once every three years

Preventive Treatment – Your dental benefit covers adult prophylaxis, which is a preventive cleaning. A cleaning removes the plaque and calculus (tarter) from your teeth, generally above the gum line. By removing the plaque that causes tooth decay and gum infections, your dentist can help you achieve healthier teeth and gums.

Your plan covers:

- ✓ Two cleanings a year
- ✓ Fluoride application [varnish or excluding varnish] twice per year

Imaging – Your dental benefit covers bitewings, intraoral complete series, and intraoral periapical x-rays. Bitewing x-rays capture images of the upper and lower teeth as well as half of the roots and supporting bone. They are used to detect decay between teeth. Your dentist may take one or multiple bitewing x-rays on each side of your mouth during a dental exam. Intraoral complete x-rays are the most common and survey the whole mouth, displaying roots and crowns of all teeth. Periapical x-rays capture images of the whole tooth, detecting changes in the tooth root and surrounding bone structures.

Your plan covers:

- ✓ One set of bitewings (one, two, three or four images) per year
- ✓ One intraoral complete series every three years
- ✓ One intraoral periapical first image per year
- ✓ One panoramic file every three years

Restorative Treatment – Your dental benefit covers amalgam fillings and resin-based composite fillings. An amalgam filling is a metal filling, which is used to fill cavities caused by tooth decay. Resin-based composite fillings are “tooth colored” fillings, also used to fill cavities caused by tooth decay.

Your plan covers:

- ✓ Amalgam or resin-based composite fillings

Oral and Maxillofacial Surgery – Your dental benefit covers extractions, which is the removal of a tooth. A tooth may need to be removed due to infection or being damaged beyond repair.

Your plan covers:

- ✓ Extractions of erupted teeth, exposed roots, or erupted teeth requiring removal of bone and/or sectioning of the teeth

Prosthodontics – Your dental benefit covers complete dentures (upper or lower), immediate complete dentures (upper or lower), maxillary and mandibular partial dentures with resin base (including clasps, rests and teeth) and partial resin base dentures with clasps, rests and teeth (upper and lower). Dentures or partials are removable appliances that help restore your smile, make it easier to eat and speak by replacing missing teeth. Complete dentures replace all teeth and rest on the gums that cover the jawbone. Immediate dentures are used when all remaining teeth are removed, and the complete denture is inserted in the mouth on the same day.

Your plan covers:

- ✓ Immediate, complete or partial dentures with resin base including clasps, rests and teeth

FINDING AN ARGUS NETWORK PROVIDER

To locate a dentist near you in the Argus Network, select your plan from the drop-list on www.argusdental.com/find-a-provider/

Select **Reliance Medicare Advantage** as your **Plan** type, enter your **City** and/or **Zip Code**, and then click **Search**. You can narrow your search results by typing in your current provider’s name or practice name.
